ES&E LEARNING SERIES INTEGRATED ARCHITECTURE

Integrated Control
Unify processes with multi-discipline control enabled by a scalable automation & information infrastructure.

Standard Design Framework
Streamline workflows with a modern design and development environment that spans disciplines.

Secure Data & Information
Create a more resilient industrial environment with a secure network connectivity and monitoring across applications.

System-wide Intelligence
Leverage data from existing control systems to implement open solutions that enhance and optimize operations.

Schedule any of our free 1-hour sessions from the five different training areas that showcase specific products or technologies that support an Integrated Architecture. They will explain what differentiates this technology, how it fits into a connected system, and the benefits you can achieve with an Integrated Architecture.

Plant Floor Network and Security

- Remote Access Options
- OT Network and Disaster Recovery
- Integrated Architecture Builder Network Layout
- Rockwell Security Management
- OT Cybersecurity
- Managed Switch Generic Configurations
- Network Redundancy Capabilities

Decentralized Automation Systems

- IO-Link Master Overview & Configuration
- AB IO-Link Sensors and 3rd-Party Integration
- ArmorKinetix Overview & Configuration
- ArmorKinetix Advanced Features
- Armor PowerFlex Introduction
- Armor PowerFlex Integration

Intelligent Control with Functional Safety

- PowerFlex 755TS VFD Intro with Safety
- PowerFlex 755TS VFD Advanced
- CIP Safety Devices with GuardLogix PLC
- New Guardlink Capabilities
- What's new in IC?

Opening the Integrated Architecture

- Rockwell's Expanded OPC UA Capabilities
- What's New? Rockwell Communications Software
- Extending SE with Non-Rockwell Products
- Pushing Data from Rockwell Systems to Non-Rockwell Systems
- Deploying Applications on Rockwell Edge Devices

Services & Solutions

- Asset Management
- Safety Services
